

CEDAC'S "SHEETS"

Among the activities that are conducted by our center and regarding the study, comparison and promotion of historical documents, there is also the rafting of the so called "Sheets". These are a monthly publication, curated by the managers of CEDAC, and published on the official magazine of Ente Nazionale Circhi (National Circus Organization). Through them we develop specific topics related to the history of circus and its curiosities, availing ourselves of the analysis of documents, graphics and posters – most of which are ancient and rare - treasured in our archive. The comparison and correlation between those, together with historical researches, has led, and still does, to the discovering of stories, events and details about circus shows and their artists that were unknown before.

"Sheets" are aim at increasing knowledge of the legacy of travelling shows, usually connecting various forms of art.
