

## THESIS

According to the crescent interest towards the circus world we observed recently, we decided to dedicate a specific section of our library to degree thesis related to it.

Circus has been in fact subject to an increasing cultural promotion, of which CEDAC is the one and only proponent in Italy since its foundation in 2003.

As thesis often represent some of the most original argumentation about a topic, in addition to being a valuable documentary source for future studies, we gave a part of our showcase to those who, like us, have believed and got involved in this cultural branch.

Over the years, hundreds of researchers and students have come to our centre to take advantage of our vast archive, enriching it with more than a hundred dissertations, from over 20 Universities. His shows that CEDAC has become a fundamental reference point, able to support researches in various branches: from Architecture to Languages, from Veterinary Medicine to Psychology, Law, History of Art, Economics, Art and Sociology. In addition, we also experienced a project with Physical Education professors in schools, and more with the Formation degree course and with institutes involved in Show Organization Training. To be the clearest as possible, we have chosen to display all the titles on an alphabetical basis. For each student a personal sheet has been filled in, containing a personal description and a brief abstract.
